Radius Conveyor Sheaves With More Versatility

New Design

Featuring Solid Side Plates

The new Greenlee conveyor sheaves feature solid side plates without a steel framework. Without the framework, they are much easier to use when going around corners or when going into vaults, and they are lighter in weight for easier handling. The new sheaves are available in 24”, 36”, and 48” radii so they can be matched to the minimum bend radius of the cable. The new sheave assemblies all use 6” diameter x 5” wide sheaves to accommodate large diameter cables.

Each conveyor sheave assembly is equipped with two yoke and hook assemblies for ease in attaching to building and vault structures.

The 4024 24” conveyor sheave is also equipped with an inside corner bracket. This bracket helps to stabilize the sheave when used on a corner or manhole edge.

Features

- Solid aluminum side plates provide strength and allow the sheave assembly to fit in a variety of pulling situations.
- 3 sizes to match the minimum bend radius of most large power and fiber optic cables.
- 5” (127 mm) wide aluminum alloy sheaves.
- Closure type hooks with 1” (25 mm) opening.
- Use with cable pullers having a maximum pulling force of 4,000 lbs. (17.8 kN).

Specifications

Conveyor Sheave Specifications	
Maximum Pulling Force:	4,000 lbs. (17.8 kN)
Weight:	4024 – 54 lbs. (24.5 kg) 4036 – 60 lbs. (27 kg) 4048 – 83 lbs. (38 kg)

Ordering Information

CAT #	UPC #	DESCRIPTION	QTY
4024	26368	24” (610 mm) Conveyor Sheave with 6 Sheave Wheels	1
4036	26369	36” (914 mm) Conveyor Sheave with 8 Sheave Wheels	1
4048	26370	48” (1219 mm) Conveyor Sheave with 10 Sheave Wheels	1
