Greenlee Communications™ introduces new line of fiberTOOLS™ Splice-On Connectors

October 4, 2013. Greenlee Communications™ now offers a cost-effective solution for field terminating Single-Mode (SM) and Multi-Mode (MM) fiber cables with the launch of fiberTOOLS™ Splice-On Connectors.

“We designed these Splice-On Connectors for low insertion and return loss,” said Thieu Do, Business Manager for Fiber Tools at Greenlee Communications. “They’re engineered to exceed industry standards and reduce the need for cleaving and rework – saving time when field terminating fiber optic cables.”

Splice-on Connectors are available in 19 different configurations for SC, LC, FC and ST pre-polished, pre-cleaved terminations. All connectors come with a 900-micrometer boot, which protects and houses the fiber splice from damage. The extended dust cap is also color-coded for easy fiber identification.

All Splice-on Connectors are optimized for use with the Greenlee Communications 910FS Optical Fusion Splicer.

For more information, contact your local Greenlee representative, visit www.greenlee.com, or call 1-800-436-0786.

Greenlee

[Greenlee](http://www.greenlee.com) is known as a global leader in the professional tool category. The Rockford, Illinois-based company develops high quality innovative products distinguished by customer-driven design and differentiated by supply chain excellence.
