Greenlee's new Cable Length Meters offers fast, easy, versatile measurement options for large cable spools

Rockford, IL. <u>Greenlee</u> continues to drive efficiency with the introduction of new cable length meters, developed for measuring the length of insulated copper and aluminum conductors on a spool. The versatile CLM-1000 is designed for AWG/kcmil wire and cable while the CLM-1000E can be used for metric wire and cable.

No need to make time-consuming estimates based on weight or turns of cable on the spool, or to rely on manually-recorded usage that could be inaccurate. The new Greenlee cable length meters feature 20,000 count LCD with backlight, Kelvin-type alligator clips, with solid copper contacts to assure low-resistance connection to the cable being measured, automatic

temperature compensation for maximum accuracy and convenience and an automatic power off switch to maximize battery life.

It only takes a few simple steps to make an accurate length measurement on a spool of cable. The meters measure both cable length and resistance. Length measurement range is 15 feet (5 m) to 100,000 feet (30 km) with pushbutton selection of feet or meters. Their four-wire technique allows them to make resistance measurements at least 1000 times smaller than can be accomplished with most handheld instruments.

The 20 pre-programmed cable sizes cover the most commonly used gages. The eight user-programmable settings allow direct length readings of less frequently used wire and cable sizes. The meters feature automatic temperature compensation removing the need for a calibration coil.

Greenlee

<u>Greenlee</u> is known as a global leader in the professional tool category. The Rockford, Illinois-based company develops high quality innovative products distinguished by customer-driven design and differentiated by supply chain excellence. Greenlee also leverages its powerful brands such as Greenlee Communications, Greenlee Utility, Sherman + Reilly, HD Electric and Klauke in the electrical, construction and maintenance markets worldwide. More information is available at www.greenlee.com.

Textron

Textron Inc, is a multi-industry company that leverages its global network of aircraft, defense industry, and finance businesses to provide customers with innovative solutions and services. Textron is known around the work for its powerful brands such as Bell Helicopter, Cessna, Beechcraft, Hawker, Jacobsen, Kautex, Lycoming, E-Z-Go, Greenlee, and Textron Systems. For more information visit: www.textron.com.
